

Lessons learned from Alternative Fuels Experience - Expert Workshop

Participation

- **Date: Friday, 30th October, 12:00-15:00 CEST**
- Invited are all interested experts inside the AMF TCP as well as external experts
- The link to the BBB meeting room is:
<https://bbb.best-research.eu/b/and-fbq-arg-kie>
Access code: 032021

Goal of the workshop

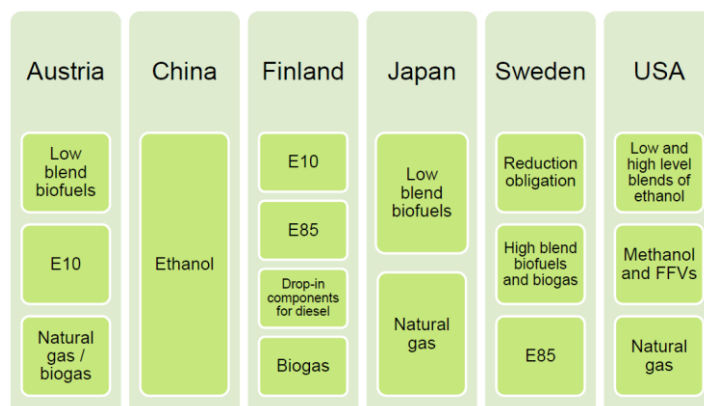

Within this workshop the findings from different case studies in the participating countries will be presented. The lessons learned and recommendations derived from our project will be discussed with the workshop participants. The goal is to verify our findings and to derive key messages.

Background

Decarbonizing the transport sector is one of the key goals of national and international climate change mitigation policies. Alternative fuels and propulsion systems are of particular importance in reducing GHG emissions from this area. However, experience with various attempts to introduce alternative fuels and vehicles to the market has shown that this is not always successful. Several countries in the AMF TCP have therefore conducted joint work on lessons learned from market launch attempts.

Case Studies

Title	Presenter
Welcome and introduction to IEA AMF Annex 59	<i>Andrea Sonnleitner, BEST - Bioenergy and Sustainable Technologies</i>
Lessons Learned from the Austrian Case Studies	<i>Andrea Sonnleitner, BEST - Bioenergy and Sustainable Technologies</i>
Lessons Learned from the Chinese Case Study	<i>Ye Wu, Tsinghua University</i>
Lessons Learned from the Finnish Case Studies	<i>Nils-Olof Nylund, VTT Technical Research Centre of Finland</i>
Lessons Learned from the Japanese Case Studies	<i>Masayuki Kobayashi, Organization for the Promotion of Low Emission Vehicles (LEVO)</i>
Lessons Learned from the Swedish Case Studies	<i>Magnus Lindgren, Swedish Transport Administration</i>
Lessons Learned from the U.S. Case Studies	<i>Michael Wang, Argonne National Laboratory</i>
Discussion on Key messages	
Closing remarks	
End of workshop
